

Class 2 newsletter

15th May 2015

Year 1

English

In English we will be working on the laptops to improve our ICT skills. We will use our knowledge of explanation texts to write the life cycle of a butterfly. We will also update our sunflower diaries to explain how flowers grow and do further measuring outside.

Maths

In maths we will be looking at the mathematical vocabulary we use to give direction and to describe movement and position. We will program the BeeBots to make their way around the classroom. We will also be looking at fractions and finding a fraction of a number.

On Friday it is maths Enrichment Day where we will be creating lots of artistic pieces of work relating to maths. It will be a very exciting day!

Topic

Following our learning about healthy foods we will have a healthy food only picnic. Fingers crossed for a sunny day!

Reception

We have now planted out our sunflowers alongside some tomato plants. Fingers crossed the children will see a lovely display of sunflowers. Now we know all about butterflies we are hoping to see them visit our forest garden.

We did lots of measuring this week, including how big we all are and the playing field.

We made up a class fantasy story using lots of different objects and the children took their ideas and wrote their own story. Wow!

Coming up

We will be using the laptops to write up our version for the Hungry Caterpillar including the lifecycle of the butterfly. We can also show off our ICT skills.

Other Notes

Class 2 are making musical instruments next week and we desperately need cereal boxes and small plastic bottles. Please save and bring to school if you can. Thank you.

Please remember to take your P.E and water bottle home next Friday.

Next Week

Monday: Library books returned please.

Tuesday: Forest schools for Reception.

Wednesday: PE kit needed. Show and Tell.

Thursday: Homework books handed in by today please.

Friday: No Stay and Play or P.E as it is our Maths Enrichment Day.
