

Class 1 newsletter

15th May 2015

Planting

We have looked more closely at the lifecycle of a plant this week.

We found out that our bean plants will flower before producing the pod containing the beans. We hope we will be able to bring these new beans home to plant in order to continue the lifecycle.

The children were great at planting, we definitely have some budding gardeners amongst us.

WOW slips

Thank you so much for completing the WOW slips for us this week, they have been coming in thick and fast.

We have found out lots of things about the amazing children in class 1... Serbian dancing, reading on sight, counting in 5's, performing in shows—Fantastic!

Measuring

Not only did we measure our bean plants we also had a go at measuring a range of objects in the classroom. Everyone could compare and order different items by length. Some children were even able to use a ruler and metre stick independently. Great work!

What are we doing next week..?

We will continue our work on Jack and the Beanstalk. This week we are going to re-tell the story using pictures and will have a go at writing our own versions of the story.

In maths we are continuing our investigation of measures. This time focusing on weight and capacity. We will also look closely at patterns.

Week beginning 18th May...

Monday: Library books

Tuesday: Forest schools pm

Wednesday: PE kit. Show and Tell am

Thursday: Maths Challenge homework collected in today

Friday: Maths/Art day. No stay and play this week. Break up for half term 22nd May
Please remember to bring your book bag into school and keep it in your drawer.
