

Class Eight/Nine

Friday 19th June 2015

Project

For your next project we would like to extend the work that we have been doing on mapping. Your task is to draw a map of your journey to school. You need to think about all the left and right turns you make, which roads you walk down and cross, and what interesting places you pass along the way. Please include lots of pictures of the places you pass on your map. Your map should be so good that I could use it to travel from your house to school!

Be creative with your map. It does not need to look anything like a map you would buy, but it should contain plenty of detail and most importantly, be useable. Once you have made it, try to use it to come to school.

Spellings

By next Thursday (25th June) you need to complete the 'ough' crossword.

Extension

Look for 'ough' words in your reading book.

Maths

Next week we will be using our knowledge of square numbers and factors in a range of investigations.

Other Notes

Remember that you are going on a trip to the National Coal Mining Museum next week. Please remember to wear suitable clothing and footwear for being outdoors all day (including a coat, just in case), and of course your packed lunch.

We will be leaving school promptly each morning, so please make sure you are bright and early.
