22nd January 2016

Homework

We are really looking forward to our China Enrichment Day on Tuesday where we will be learning more about the country.

What have we done this week?

Today the children have all been experimenting with capacity and accurately measuring different amounts of water in millilitres (ml). What other units of measurement do we use when measuring capacity?

There has been some very good work in today's English lesson with Mrs. Carr-Brion where the children focused on using connectives in their writing. Hopefully they will continue this good work and start using more connectives (than they already do) in their day-to-day writing. Keep up the good work Class 3!

Today, in Science, the children have been categorising different animals by their appearance e.g. Whether they have 2, 4, 6, 8 or no legs, whether they can swim or not etc. Can you think of any animals that have wings and can swim?

Next Week

English - we will be looking at making our own stories from another culture

Maths - we will be looking at new methods for addition and subtraction.

Tuesday - China Enrichment Day

Wednesday - spellings and homework book.

Thursday - flapjack day so bring 50p if you want one!

Show and tell: Red group.

Bring your reading record every day!
